# $\pi^2$ Soft

Functional e-commerce

Fast

Easy Interface

Secure

Scalable

✓ Multi-language support

✓ Drop Shipping

Incoming orders may be redirected to other branches depending on circumstances such as proximity/distance, open/closed and order intensity

✓ Branch-specific

Each branch has its own order screens

✓ Pricing vector

The entered product may have the specification of kg, size, quantity, the number of people or any quantity

✓ Customized delivery

The user who places the order is able to choose delivery date and time.

✓ Multiple shipments

We can handle the situation with a single order when we want to send different products to multiple sites at different dates
